PROFILE

An organized and experienced software engineer. Holds a Bachelor's degree in Computer Systems Engineering from Bangor University in the United Kingdom. I have 7 years of experience in developing secure and scalable applications using PHP and Laravel. I completed major government projects for the Ministry of Electricity and Water and the Public Authority for Housing Welfare in Kuwait, and contributed to raising system efficiency and digital transformation. I also developed several projects including educational platforms and e-commerce stores. I am looking for a job opportunity with a professional technical team to continue professional development.
